Eagle's Nest Outreach Center Announces Funding for Money and Energy Savings Program

Baltimore, Maryland (May 14, 2013) Today, the Eagle's Nest Outreach Center announced \$52,500 in energy efficiency grants for low to moderate income residents. The funding will be available to 20 homeowners residing in the Greater Greenmount and Coldstream Homestead Montebello communities for money saving energy retrofits, audits and Energy Star appliances. The funding comes from the Maryland Energy Administration's EmPOWER Clean Energy Communities Low-to-Moderate Income Grant Program.

"Following Civic Works successful footsteps of bringing energy audits and upgrades to Baltimore's neighborhoods, we are excited to create our own Healthy Living division," said LaKiesha Brown, Executive Director of the Eagle's Nest Outreach Center. "We are looking forward to assessing the energy consumption of the homes in our neighborhood and improving the lives of our families through money and energy saving upgrades."

A Green Summit workshop will be held on Saturday, June 8, 2013 at 12:00 pm – 2:00 pm to educate homeowners on how to create a healthy home and become energy efficient. The Green Summit workshop will be held at Maranatha Apostolic Temple located at 701 East 25th Street. Further details regarding the Summit will be announced soon. Applications for homeowner grants are available on a first come, first served basis. Additional details will be displayed on our website: eaglesnestoutreachcenter.weebly.com

The Eagle's Nest Outreach Center was established in 2009 as a non-profit organization with the mission to assist low-income East Baltimore community and their respective families with human services through self-sufficiency. Our programs include the Youth Ambassador program, adult workshops and outreach services.
